ACPHIS Recommended Conferences list last review October, 2024

Conference Name and Commencement year [Generic – G/Specialised-S]	Peer review process	FOR Code(s)	Relevance to PhD students and ECRs	Notes on conferences evaluation criteria
Australasian Conference on Information Systems (ACIS) **1990 [G]**	Double blind, full paper peer review	46090 - IS 350303 Business IS	DC ECR Mid-Career	The Australasian Conference on Information Systems is the premier conference in the Australasian region for the IS discipline. It is held annually in Australia and New Zealand since 1990. **Held in December**
European Conference on Information Systems (ECIS) **1993 [G]**	Double blind, full paper peer review	46090 - IS	DC ECR Mid-Career	The annual European Conference on Information Systems (ECIS) is viewed as one of the leading conferences on IS and the only Association for Information Systems (AIS) conference dedicated to the European Region. ECIS is the newest regional conference endorsed by the AIS Council and governed by the AIS Region 2 Board. **Held in June**
International Conference on Information Systems (ICIS) **1980 [G]**	Double blind, full paper peer review	46090 - IS	DC ECR Mid-Career	The most prestigious international gathering of IS academics and research-oriented practitioners in the world. The conference activities are primarily delivered by and for academics, though many of the papers and panels have a strong professional orientation. In addition to the main conference, it offers several pre-conference events organised by the Special interest groups (SIGs) of AIS. **Held in December**
Americas Conference on Information Systems (AMCIS) **1995 [G]**	Double blind, full paper peer review	46090 - IS	DC ECR Mid-Career	The Americas Conference on Information Systems (AMCIS) is an annual conference for IS and information technology academics and professionals sponsored by the Association for IS. AMCIS is widely considered to be one of the most well attended conferences for IS/IT in the Western Hemisphere and provides a platform for panel discussions and the presentation of peer-reviewed IS research papers. The conference offers a wide range of opportunities for research students and ECRs for networking and career development events. **Held in August**
Pacific Asia Conference on Information Systems (PACIS) **1993 [G]**	Double blind review of full papers	46090 - IS	DC ECR Mid-Career	The annual Pacific Asia Conference on Information Systems (PACIS) is viewed as one of the leading conferences on IS and the only AIS conference dedicated to the Pacific Asia Region. PACIS is endorsed by the AIS Council and governed by the AIS Region 3 Board. Since 2000, PACIS has been held annually in different cities throughout the Asia Pacific, generally within East Asia and Australasia. **Held in July**

ACPHIS Recommended Conferences list last review October, 2024

Hawaii International Conference on System Science (HICSS) **1968 [G]**	Double blind, full paper peer review	46090 - IS 350303 Business IS	DC ECR Mid- Career	The Hawaii International Conference on System Sciences (HICSS) is an annual conference for IS and Information Technology academics and professionals sponsored by the University of Hawaii at Manoa's Shidler College of Business. The conference provides a platform for panel discussions and the presentation of peer-reviewed IS research papers. According to Microsoft Academic in 2021, in terms of citations, HICSS has ranked first among IS as well as business conferences and overall, ranked 37th among all conferences indexed by Microsoft Academic. HICSS conference offers a diverse set of mini-tracks focused on the most current, as well as well-established, traditional areas of IS. Each mini-track operates as its own mini-conference with several sessions and often an invited talks and key notes. **Held in early January on one of the Hawaii islands**
Association for Information Systems European Conference on Information Systems Education and Research (ECISER) [S] **2024**		460906 IS education	ECR Mid-Career	The AIS Special Interest Group on Education, SIGED, is dedicated to promoting excellence in information management/systems/technology education, research and practice. This a relatively new conference organised as a pre-conference event for ICIS. **Held in July**
Association for Information Systems International Conference on Information Systems Education and Research (ICISER) **2013 [S]**	Double blind, full paper peer review	4610 - Library and information studies 460906 IS education	ECR Mid-Career	The AIS Special Interest Group on Education, SIGED, is dedicated to promoting excellence in information management/systems/technology education, research and practice. This is a relatively small, specialised conference. **Held in December in association with ICIS**
IFIP WG 8.1 - currently Design and Evaluation of Information Systems (PoEM) <mark>2008 [S]</mark>	Double-blind for the open conference, and submissions reviewed by a program committee for the workshop	460903 - Information modelling, management and ontologies 3503 - Business systems in context	DC ECR Mid-Career	First IFIP WG 8.1 Working Conference, PoEM 2008, held in Stockholm, Sweden, November 12-13, 2008. Before this, Situational Method Engineering: Fundamentals and Experiences in 2007. Was running various open conferences together with other WGs, and as pre-ICIS events The working conference submissions go through a double blind review process with two reviewers and an AE. Acceptance rates vary, but are typically less than 50% for full papers and slightly higher for research in progress submissions. Working conference proceedings are normally published by Springer as volumes in the Advances in Information and Computing Technology series (https://www-springer-com.ezp.lib.cam.ac.uk/series/6102) The OASIS workshop is intended for paper development. Submissions are vetted by the conference committee for their relevance to the workshop theme and those accepted are assigned either to roundtable discussions (with 3 or 4 papers and a senior scholar) or poster presentations. We particularly

				welcome submissions from junior scholars and seek to provide a supportive environment in which they can get experience in presenting their research and receive feedback from more experienced scholars. Papers are not normally published, but authors may be invited to submit the final version of their paper to a journal special issue (most recently EJIS). Relatively small conference, 12 papers in 2023 see index in: https://dblp.org/db/conf/ifip8-1/index.html **Held in November**
IFIP WG 8.3 - Decision Support Systems **1981 [S]**	Double blind, full paper peer review	460902 Decision support and group support systems 3503 - Business systems in context	DC ECR, Mid-Career	From its foundation in 1981, the goal of the International Federation of Information Processing (IFIP) Working Group 8.3 has been to share ideas about the design, development, use, and impact of systems intended to support decision makers and about the process of decision-making – in other words, to contribute to the accumulation of knowledge in the field of decision support systems (DSS). The group is organising bi-annual open conference as a special event dedicated to the advances of decision support research knowledge. Since 2016 conference proceedings are published as supplemental issues of the Journal of Decision Systems published by T&F. This is a primary event for researchers in decision support and business analytics field. **Biennial (even year)**
INTERACT - IFIP TC13 - International Conference on Human-Computer Interaction **1984 [S]**	Peer reviewed, juried & curated by Programme Committee and Sub-committees	460905 - IS development methodologies and practice 460906 - IS education 460907 - IS for sustainable development and the public good 460908 - IS organisation and	DC ECR Mid-Career	The INTERACT Conference is held every two years. It started in 1984, making it one of the longest running conferences on human-computer interaction. Human-computer interaction research (has 12 tracks). **Held in September Biennial**

		management nt 460910 - IS user experience design and developme nt		
[IFIP WG 8.2 - The interaction of IS and the organization](#) **1986 [S]**	Program committee double-blind refereed papers	460908 IS organisation and manageme nt	ECR Mid-Career	Working Group 8.2 is "concerned with the generation and dissemination of descriptive and normative knowledge about the development and use of information technologies in organizational contexts. IFIP 8.2 offers research events in two formats which are usually carried out on an alternating bi-annual basis. First a "Working Conference" (currently held in odd years) is a stand-alone, multi-day event. In addition, "OASIS Workshop" (currently held in even years) is usually associated with a larger conference (thus far, mostly the International Conference on Information Systems (ICIS) and offers the community a platform to engage with and help develop each other's work. The last one was: A joint Working Conference of IFIP Working Groups 8.2 and 9.4 was held in Hyderabad, India on 7 and 8 December 2023 (preceding ICIS). Further details at https://www.ifip2023.org/ Relatively small research gathering, 12 papers in 2023 Both events are organized by a conference committee, but the Working Conference usually also recruits a program committee that organizes the review process. As a working group, we recommend to the committees that reviews are carried out in a double-blind fashion. **OASIS workshop held in December pre-ICIS**
[IFIP WG8.6 - Diffusion, transfer and implementation of information technology](#) **1993 [S]**	Double-blind peer-review process.	350307 460907 350302 460908 460909	Paper Development Workshop ECR Mid-Career	The objective of the IFIP WG8.6 group was "to foster understanding and improve research in practice, methods, and techniques in the transfer and diffusion of information technology within systems that are developed, and in the development process" The aim of this conference is to bring together scholars and practitioners from interdisciplinary fields in order to enrich the scholarly reflection on the adoption, use, impact and potential of next-generation digital technologies. Proceedings published by Springer IFIP Advances in Information and Communication Technology (IFIPAICT).

International Conference on Design Science Research in Information Systems and Technology (DESRIST) **2005 [S]**	Double blind, full paper peer review	4609- IS 460910- IS user experience design and development	DC ECR Mid-Career	Viewed as one of the leading conferences on the topic of IS design, methodologies and theoretical underpinnings of IS design research. **Held in June**
ACM Conference on Human Factors in Computing Systems **1982 [S]**	Double blind;	460910- IS user experience design and development	DC (hybrid), including undergraduate students events	The ACM CHI Conference on Human Factors in Computing Systems is the premier international conference of Human-Computer Interaction (HCI). CHI – pronounced 'kai' – annually brings together researchers and practitioners from all over the world and from diverse cultures, backgrounds, and positionalities, who have as an overarching goal to make the world a better place with interactive digital technologies. Attracts graduate and undergraduate students. The conference has a wide range of awards including 3 for students (game competition, research competition, and design competition). Held in different places across the world, which makes it expensive for participants from Australia to attend. They provide day-care so attendees can bring their kids! https://chi2024.acm.org/for-attendees/information-for-families/ AKA Core call this the International Conference on Human Factors in Computing (A* conference) **Held in May**
International Conference on Advanced Information Systems Engineering (CaiSE) 1990 [S]	Single - blind review (program committee and board discuss acceptance)	460905-IS development methodologies and practice	DC ECR Mid-Career	A venue for innovative and rigorous research across the whole spectrum of Information Systems Engineering. Proceedings published by Springer Lecture Notes in Computer Science. **Held in June**
Bled eConference - digital economy 1988 [S]	Double-blind review	350303- Business IS	DC ECR Mid-Career Graduate Students ePrototype Bazaar	Bled eConference has been shaping electronic interactions since 1988. Small supportive community offers the opportunity to benefit from expertise of esteemed researchers. It attracts speakers and delegates from business, government, information technology providers and universities and is the major venue for researchers working in all aspects of digital transformation. **Held in June**

International Symposium on Accounting Information Systems (ISAIS) 2010 [S]	Double blind full paper review.	350303-Business IS	PhD ECR Mid-Career	ISAIS provides a global forum for bringing together researchers that are active on the nexus of the accounting field and the IS field to discuss and critique leading-edge research in the field. The emphasis of the symposium is on interaction, discussion, and debate in a friendly, supportive and relaxed atmosphere. It rotates annually between the USA, Australia, and Europe. The aim of the conference is to broaden the expertise and scope of discussions beyond the circle of accounting (information systems) researchers who are traditionally the strongest representatives at the conference. **Held in June**
International Conference on Formal Ontology in Information Systems (FOIS) [S]	Double blind full paper review.	460903-Information modelling, management and ontologies	DC ECR Mid-Career	FOIS is the flagship conference of the <u>International Association for Ontology and its Applications (IAOA)</u>, a non-profit organization promoting interdisciplinary research and international collaboration in formal ontology. The FOIS conference is designed to provide a meeting point for researchers from all disciplines with an interest in formal ontology. The conference encourages submission of high-quality articles on both theoretical issues and concrete applications. For researchers from all disciplines with an interest in formal ontology encouraging high quality articles on both theoretical issues and concrete applications. **Held in July**
Academy of Management (AoM) Communication, Digital Technology, and Organisation (CTO) Division 2004 [G]	Double blind	350303-Business IS	DC	This is the main annual event organised under the auspice of the CTO Division of the AoM, The CTO Division primarily encourages professional scholarship in the fields of organizational communication and information systems among members. The specific domain CTO deals with the study of behavioral, economic, and social aspects of communication and IS within and among organizations or institutions. Domain Statement by the conference organisers: Communication, Digital Technology, and Organization promotes an interdisciplinary approach to further the understanding of the behavioral, social, and economic processes at the intersection of communication, technology, and organizing. CTO emphasizes communication topics that reflect changes in the contemporary nature of work enabled through the use of mainstream and emerging technologies and systems. It constitutes a vibrant, inclusive, and intellectually stimulating community, open to scholars from a wide range of disciplines, theoretical frameworks, and research methods, who are conducting novel and cutting-edge research based on rigorous and creative scholarship. **Held yearly in July**

ACMS Symposium on User Interface Software and Technology (UIST) SIGGRAPH 1967 SIGCHI 1982 [S]	Double blind, full paper peer review	4609- IS	DC	The ACM Symposium on User Interface Software and Technology (UIST) is the premier forum for innovations in human-computer interfaces. Sponsored by ACM special interest groups on computer-human interaction (SIGCHI) and computer graphics (SIGGRAPH), UIST brings together people from diverse areas including graphical & web user interfaces, tangible & ubiquitous computing, virtual & augmented reality, multimedia, new input & output devices, Human-Centered AI, and CSCW. The intimate size and intensive program make UIST an ideal opportunity to exchange research results and ideas. **Held in July and December – Bi-annual**
International Conference on Information Systems Development (ISD) (2024) [S] 1987	Double blind, full paper review	460909 IS philosophy, research methods and theory 460910 IS user experience design and development	No special events for ECRs or students, but a good venue for networking	Conference provides a forum for research and developments in the field of IS. ISD evolved from the first Polish-Scandinavian Seminar on Current Trends in IS Development Methodologies, held in Gdańsk, Poland in 1988. ISD conference often includes a number of new and well-established tracks covering. In addition to AIS eLibrary, a book of proceedings is published by Springer with accepted papers included as a chapter. Research and developments in the field of IS. **Held in August or September**
International Conference on Business Process Management (BPM) 2003 [S]	Double blind, full paper review	460901	DC ECR Mid-Career	The BPM conference series embraces the diversity and richness of the BPM field and serves as a melting pot for experts from a mix of disciplines including Computer Science, IS Engineering, and Management. The conference is structured along three tracks: Track I: Foundations; Track II: Engineering; Track III: Management A wide range of workshops and forums, a doctoral consortium, and invites authors of journal articles on BPM topics to present their work. The International Conference on Business Process Management can be seen as the most established meeting place for international BPM researchers, attracting several hundred enthusiasts each year. **Held in September**
